

Comfort & Relieve Stress

Increase patient comfort and support well-being with relaxation content and familiar movies and TV shows.

Support Total Relaxation

Our relaxation programming features soothing, high-quality footage of beautiful scenes paired with natural sounds, soft classical music or white noise, along with meditation videos – like seated yoga or guided imagery – for optimal health and wellness promotion.

Foster Familiarity

Distraction therapy can vastly improve the patient experience. Movies, television programming and relaxation content all have the power to take a patient's mind off stressful situations and unfamiliar environments.

Improve Hospital Scores

Swank Patient Entertainment customers agree having the latest Swank movies and TV content improves their patient experience. We partner with over 900 hospitals across the nation, and many of them maintain HCAHPS scores of a 4 or 5 (out of 5).

Serving patients and families in hospital rooms, outpatient clinics, waiting rooms, infusion clinics and treatment centers across the country.
